DAINTREE AIR SERVICES is now one of the longest running air charter companies in Australia under one management team. Our success for over 30 years of operation has come from our passion for aviation. Our staff take pride in their work and are involved in all day to day operations. Our knowledge and experience is invaluable when developing flight itineraries to ensure a fast, efficient, safe and reliable air charter service.

GENERAL PASSENGER & FREIGHT CHARTER Daintree Air Services are available 24 hours a day, 7 days a week for air charter to any destination Australia wide. We cater for any job no matter how big or small from the Free Independent Traveler to large group charters across Australia. Our extensive fleet of aircraft can be configured for freight only charter, passenger only charter or a combination of both. Our friendly crew will get you to your destination safely and on time.

GOVERNMENT CHARTER Daintree Air Services specialise in local, state and federal government charter flights across Queensland and Cape York Peninsular.

OUR AIRCRAFT Daintree Air Services operate an extensive fleet of aircraft from high wing, single engine aircraft designed specifically for low level scenic flying and small remote airstrips to modern, multi engine, air-conditioned Turbo aircraft designed for economical high level cruising in luxury.

All our aircraft are maintained to the highest standard in accordance with our own S.O.M. (System of Maintenance) developed in conjunction with the Australian regulatory authorities.

OUR CREW The staff at Daintree Air Services are local professionals who can offer a wealth of knowledge on the local areas. Our friendly and punctual ground crew conduct all our ground hotel transfers and, through our air conditioned airport terminal, can provide a free tour booking service.

Our pilots are specifically trained for charter flying and are all multi-engine, instrument-rated professionals who undergo independent testing annually and are kept current on all available navigation aids (including the use of GPS GNSS(RNAV)) in both day and night operations. Daintree Air Services are also pleased to offer two-pilot operations as per client's requirements.
